Assignment # 1

Deadline: 24th February 2022

Develop a website using WordPress with the features listed below:

- Site should contain at least 3 pages of content. This could be blog posts, product information, general articles, etc. A “page” should consist of at least a paragraph of information or something similar. “Lorem Ipsum” or similar placeholder content can be used.
- Site should demonstrate that you understand the difference between pages and posts in WordPress.
- Site should contain images. You do not have to have images on every page, but you should demonstrate that you understand how to insert images into posts and pages in your website.
- You are required to use your own theme. i.e. WP provided themes not allowed.
- You need to include two plugins for your site for the purposes of the project.
- Develop a plugin for some specialized type of post. (As discussed, the Movie Plugin).
- Develop a plugin to show image gallery. You can decide the design of the gallery.
- You are required to submit your WordPress directory in zip form with database backup in sql file.
